

A reason for poverty and suffering.

Code 20204 Bastiaan

In the universe, all kind of worlds exist,

from hell worlds to heaven worlds and earthlike worlds in between.

In a heavenworld they have global providing for both in essence happiness and prosperity, and in hell worlds they miss all global things like sunlight, water, air and means to provide without danger or evil.

In heaven world, people are not obliged to work but are in freedom.

they decide when to work, when to spend at vacation or with loved ones.

in heaven worlds when suddenly sick or in disease, a cure is within a day, and curing the illness completely.

In heaven world, people of earth coming there say, finally without pain, and with happiness.

Why we come on earth with both pain, misery and bad luck sometimes because in a former life we promised to use our responsibility in the right way, to support society in full, and we violated that chance.

Because we did wrong in a former life, the Creator said, you will have to face a life with pain as to repay the gift of the creator in the former life.

As we on earth repay our debt to the Creator, and both have a chance for reaching heaven, as well to learn about the truth of life and work.

As in the universe all worlds exist, some heaven worlds, some hell worlds and for us this little planet earth.

in hell worlds they miss sunlight therefore the feeling of joy in the summer,

they miss clear spring water therefore the whole life being dirty and with thirst,

They only by being evil can get money or riches, therefore the whole life having guilt.

The reason for poverty and suffering is that we deserve this life on earth,

but by attending a religion, tradition or good work we can attain a higher world,

or the promised world in the religions or traditions

In heaven worlds, the person meets his kind of ideal when meeting the prerequisite of it.

Therefore do this life your best, and think of the best way to receive the purpose of life.
